DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2 and 3 recite the limitation "the transport control protocol" in line 4, respectively. There are insufficient antecedent basis for this limitation in the claims.

The examiner suggests changing the "transport protocol" in claim 1, line 5 to -- transport control protocol -- (see spec pg.3, ln.1-4).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by TSG RAN NBAP Specification (3G TS25.433 V1.0.2, 1999 Edition, hereinafter "the Specification").

Regarding claim 1, the Specification discloses a method of establishing a radio link between a CRNC (pg.17, sec.9.18 *an access network controller*) and a Node B (*a base station*), forming a setup request message (*a request message*) for establishing the

link by including (*concatenating*) a message of the Diversity Control Filed (pg.25, sec.9.1.2 *information message for control protocol*) and a plurality of the Transport Format Sets (pg.24, sec.9.1.2 *a plurality of transport protocol*); transmitting the setup request message from the CRNC (*access controller*) to the Node B (*base station*) as shown in the Figure in page 17; and receiving the setup response message (*response message*) sent back by the Node B to CRNC.

Regarding claim 2, it is a claim corresponding to the transport control protocol of the request message in claim 1 and is therefore rejected for the similar reasons set forth in the rejection of claim 1.

Allowable Subject Matter

5. Claims 3-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
